

Overworld Section Label Audit

Three-source mobile PDF: Nintendo Power, NES Game Atlas, and the user-supplied fan map.

Purpose

This mobile version preserves the three-source audit while replacing the wide markdown table with stacked cards. It is a review artifact, not a naming-policy change.

Fan Map Inventory

The fan map is a schematic route map. Transcribed labels include Debora Cliff, Jam Wasteland South/North, Andole, Storigoy Cemetery, Aldora, Dead River, Jova, Jova Woods, Belasco Marsh, South Bridge, Berkeley Mansion, Denis Woods, Veros Woods, Veros, Dabi's Path, Aljiba Woods, Lake Path, Yuba Lake, Camilla Cemetary, Rover Mansion, Joma Marsh West/East, Laruba Mansion, Devious Woods, Uta Lake, Uta Path, Bodley Mansion, Wicked Ditch, Donya, North Bridge, Dora Woods, Yomi, East Bridge, Vlad Graveyard, Denis Marsh, West Bridge, Vlad Mountain, Castlevania, and Dracula's Chamber.

Five Active Naming Concerns

Bordia Mountains

Current: Bordia Mountains

Nintendo Power supports Bordia Mountains; NES Atlas appears to use the Uta Lower Road family; the fan map labels the right-end mountain area Vlad Mountain.

Long Bridge to Bordia Mountains

Current: Long Bridge to Bordia Mountains

Nintendo Power is broad/unclear at this fine split; NES Atlas and the fan map both point toward East Bridge / Denis Marsh in this route family.

Debious Woods

Current: Debious Woods - Part 1/2/3

Nintendo Power and NES Atlas use Debious Woods; the fan map uses Devious Woods and also splits adjacent sections into Uta Lake and Uta Path. The ROM-derived guide art for these sections does not visually read as woods.

Castlevania Bridge

Current: Castlevania Bridge

Nintendo Power's bridge text near Castlevania remains unclear; NES Atlas and the fan map both label this bridge West Bridge.

Yuba Lake Path

Current: Yuba Lake Path

Nintendo Power does not clearly label the approach as its own named section; NES Atlas likely maps it to Lower Road; the fan map labels this approach Lake Path.

Additional Conflicts

- Lauber Mansion versus Rover Mansion: Nintendo Power supports Lauber; NES Atlas and the fan map support Rover.
- Vrad versus Vlad: Nintendo Power and the current guide use Vrad; the fan map uses Vlad.
- Town spellings on the fan map differ from both published maps and current guide labels: Andole, Aldora, and Donya.
- Storigoi Graveyard becomes Storigoy Cemetery on the fan map.
- Dabi's Path / Dabis Path remains a punctuation/spelling policy question, but all sources point to the same route.

Policy Implications

- The fan map strengthens Castlevania Bridge as a concern because it agrees with NES Atlas on West Bridge.
- The fan map strengthens the Yuba approach concern by using the simpler Lake Path label.
- Bordia Mountains becomes a three-way disagreement: Nintendo Power has Bordia Mountains, NES Atlas appears to use Uta Lower Road, and the fan map uses Vlad Mountain.
- Devious Woods remains plausible as a broad region label, but the fan map suggests nearby sections may be better understood as Uta Lake or Uta Path.

Recommended Next Step

Before renaming guide data, make a small topology/name proof artifact for the five active concerns that maps ROM context objset/area/submap, guide segment id, current guide placement, Nintendo Power region, NES Atlas number, fan-map label, and ROM-rendered visual style side by side.
